FLASHPOINT™

BINGO DISPLAY

LET YOUR FINGERS DO THE 'CALLING!'

Video King's FlashPoint Bingo Display™ is the ideal solution for all those senior centers, fraternal organizations and smaller-scale venues that need a Bingo display.

And, it makes no difference whether you use a roll cage, Bingo console or random number generator to "call" the balls!

The caller simply touches the called number on the computer screen, and that numbered ball zooms onto both the computer and TV – for those players who may not have clearly heard the call.

The caller determines how many seconds the called ball is zoomed, before the computer and TV return to the 75-number Bingo display, which shows everyone all the called balls.

For added pizzazz, an animated Bingo graphic will be displayed when the caller presses the "Bingo" button on the touch screen, once Bingo is called. To begin a new game, the caller simply touches a button on the screen to "Clear Balls."

Designed specifically for smaller-scale budgets at smaller-scale halls, the software can be sold separately or as a package, which includes the software, a widescreen (16:9) TV, a touch-screen computer and cables – in all. So if you're looking for a low-budget solution for an even grander display, you know whom to call ...

**PRESS START TO
DISPLAY FLASHBOARD**

**TOUCH A NUMBER
TO MAKE A BALL CALL**

**LARGE SIMULATED
BALL IMAGE APPEARS**

**ANIMATED GRAPHICS
SIGNIFIES A BINGO**
